Exercise sheet 11, 23.6.2023

Exercise 1 (Computing IMin) (5 pts)

Develop an $O(n)$ algorithm for finding the bounds of intervals $IMin[p_i]$ for all p_i in a permutation p of size n. (Suggestion: Find the left and right bounds separately.)

Exercise 2 (Generators for common intervals) (5 pts)

For the permutation $(4\ 3\ 2\ 1\ 5\ 6\ 7)$,

1. compute generator (Sup, Inf), and
2. visualize the intervals $(i..R[i])$ and $(L[i]..i)$.

Exercise 3 (Combining generators) (5 pts)

Prove (in your own words) the following lemma:

Lemma. *Let* (R_1, L_1) *and* (R_2, L_2) *be generators for common intervals of two sets* $\mathcal{P}_1$ *and* $\mathcal{P}_2$*. The pair* $(\min(R_1, R_2), \max(L_1, L_2))$ *is a generator for the common intervals of* $\mathcal{P}_1 \cup \mathcal{P}_2$*.*

Note that $\min(R_1, R_2)$ at position i is defined as $\min(R_1[i], R_2[i])$ and $\max(L_1, L_2)$ is defined analogously.
